Summary

PROFILE

I am a goal-oriented, self-motivated team player with group organization and diplomatic skills who specializes in the detailed acquisition of geospatial field data and careful computation of the data for enhanced interpretation. My insatiable quest for deploying technological advancement in solving problems made me delve into programming languages and now I am a certified web developer who is still aspiring to become a full-stack developer.

Experience

Field Specialist

Enugu Electricity Distribution Plc.

Jan 2019 - Present (3 years 11 months +)

Reports to the GIS Supervisor Anambra.

Responsible for the day-to-day acquisition of accurate geospatial data useful for enhanced analysis and decision-making.

Responsible for a detailed and accurate computation of GIS data using the MDC GIS APP customized for company use.

I am responsible for coordinating the field activities and other GIS staff.

I have onboarded 725 additional customers to the company.

I have identified 23 spots of loss of revenue to the company and closed them up which increased company revenue.

I have identified 5 staff stealing from the company and giving us a bad face. I reported them to the Auditor

through my supervisor, they were investigating, three were sacked and two got queries and caution (this made others seat up).

I train staff with less expertise in geospatial data acquisition.

I engage in diplomatic relations and negotiations.

Geologist

Precious Aurum Integrated Services (PAIS)

Jan 2017 - Jan 2018 (1 year 1 month)

Reported to the Chief Operations Officer (COO).

I plan for geologic exploration and develop efficient workflow patterns, peculiar to each exploration and location.

I took charge of the acquisition of geophysical data in the forms of geoelectric, geologic, and geomagnetic.

I maintained diplomacy and peace, within host communities.

I executed geologic mappings and regular routine reporting.

I went on a rescue mission where a misunderstanding was escalating between the community and our staff.

I resolved the dispute in just two days and exploration continued even more efficiently.
I lead the team in the exploration of Galena in Ikwo, Ebonyi state.
I was part of the team that explored Galena in Wasse, Plateau state, and Onyinkwa, Ebonyi state.
I kick-started the mining of Galena in Ikwo, Ebonyi state.

Computer Engineering

CEENERO

Jan 2016 - Jan 2017 (1 year 1 month)

I was trained in computer hardware maintenance and repair.
I was also trained in software installations and troubleshooting.
I was trained in Computer networking.

Geography Teacher

Government Day Secondary School Dutsi.

Jan 2015 - Jan 2016 (1 year 1 month)

I taught physical geography, human geography, and map reading to senior secondary school students, and
accessed them by organizing an examination.

Education

Enugu State University of Science and Technology

Bachelor of Science, Geology and Mining
